| AG Labor | Check water pump , very loose, order new pump. Drain cooling system , remove old water pump and install new unit. Wile filling system found a whole rusted in coolant reservoir, pull tank and braze up whole , and finish filling system and start engine. Noted engine oil showing up in coolant :(, This got worse as engine wormed up. This is likely a bad engine oil cooler. Advise Joseph. | 3 | 3 | 70.00 | 210.00 |
